Category B3 gaming machines review

Following reports published today in the trade publication Coinslot, Praesepe understands that in the coming weeks the UK Department of Culture, Media and Sports (“DCMS”) may make a long anticipated announcement regarding the stake size, prize pay out and number of Category B3 machines that can be operated from a single gaming venue.

As previously announced, Category B3 machines are an important part of Praesepe’s commercial offering and any increase in stakes would have a positive impact on our business and the potential for revenue growth.

We are pleased that the Government is looking at ways to support the gaming sector and in particular UK gaming machine manufacturers.
